PLC_OPC [CPU 1511-1 PN]

PLC_OPC

General\Project information

Name	PLC_OPC	Author	pc1	Comment	
Rack	0	Slot	1		

General\Catalog information

Short designation	CPU 1511-1 PN	Description	CPU with display; work memory 150 KB code and 1 MB data; 60 ns bit operation time; 4-stage protection concept, technology functions: motion control, closed-loop control, counting and measuring; tracing; Runtime options; isochronous mode (central); for all PROFINET interfaces: transport protocol TCP/IP, secure Open User Communication, S7 communication, S7 routing, IP forwarding, Web server, DNS client, OPC UA: Server DA, Client DA, methods, companion specifications; PROFINET IO controller, supports RT/IRT, performance upgrade PROFINET V2.3, 2 ports, I-Device, MRP, MRPD, isochronous mode; firmware V2.9	Article number	6ES7 511-1AK02-0AB0
Firmware version	V2.9				

General\Identification & Maintenance

Plant designation		Location identifier		Installation date	2026-08-10 21:08:03.807
Additional information					

General\Checksums

Text lists	FA 70 E8 75 1D 5A 8E 29	Software	A2 23 14 1F 6C 40 4C D1		
------------	-------------------------	----------	-------------------------	--	--

PROFINET interface [X1]\General

Name	PROFINET interface_1	Author	pc1	Comment	
------	----------------------	--------	-----	---------	--

PROFINET interface [X1]\Ethernet addresses\Interface networked with

Subnet:	PN/IE_1				
---------	---------	--	--	--	--

PROFINET interface [X1]\Ethernet addresses\Internet protocol version 4 (IPv4)

IP configuration	Set IP address in the project	IP address:	192.168.1.50	Subnet mask:	255.255.255.0
Use router	False				

PROFINET interface [X1]\Ethernet addresses\PROFINET

PROFINET device name is set directly at the device	False	Generate PROFINET device name automatically	True	PROFINET device name:	plc_opc.profinet interface_1
Converted name:	plcxbopc.profinetxainterfacexb1ef75	Device number:	0		

PROFINET interface [X1]\Time-of-day synchronization\NTP mode

Time-of-day synchronization	Disabled	NTP Server 1		NTP Server 2	
NTP Server 3		NTP Server 4		Update interval	10s

PROFINET interface [X1]\Operating mode

IO controller	True	IO system		Device number	0
IO device	False				

PROFINET interface [X1]\Advanced options\Interface options

Call the user program if communication errors occur	False	Support device replacement without exchangeable medium	True	Permit overwriting of device names of all assigned IO devices	False
Limit data infeed into the network	False	Use IEC V2.2 LLDP mode	False	Keep-Alive connection monitoring:	30s

PROFINET interface [X1]\Advanced options\Media redundancy

MRP domain	mrpdomain-1	Media redundancy role:	Not device in the ring		
------------	-------------	------------------------	------------------------	--	--

PROFINET interface [X1]\Advanced options\Real time settings\IO communication

Send clock:	1.000ms				
-------------	---------	--	--	--	--

PROFINET interface [X1]\Advanced options\Real time settings\Synchronization

Sync domain:	Sync-Domain_1	Synchronization role:	Unsynchronized	RT class:	RT,IRT
--------------	---------------	-----------------------	----------------	-----------	--------

PROFINET interface [X1]\Advanced options\Real time settings\Real time options

Calculated bandwidth for cyclic IO data:	0.000ms	Calculated bandwidth for cyclic IO data:	0.000%		
--	---------	--	--------	--	--

	Monitoring of partner port is not possible	Alternative partners	False	Partner port:	Any partner	
PROFINET interface [X1]\Advanced options\Port [X1 P2R]\Port options\Activate						
Activate this port for use	True					
PROFINET interface [X1]\Advanced options\Port [X1 P2R]\Port options\Connection						
Transmission rate / duplex:	Automatic	Monitor	False	Enable autonegotiation	True	
PROFINET interface [X1]\Advanced options\Port [X1 P2R]\Port options\Boundaries						
End of detection of accessible devices	False	End of topology discovery	False	End of the sync domain	False	
PROFINET interface [X1]\Web server access						
Note	The Web server must also be activated in the properties of the PLC.	Enable Web server via IP address of this interface	False			
Startup						
Startup after POWER ON	Warm restart - Operating mode before POWER OFF	Comparison preset to actual configuration	Startup CPU even if mismatch	Configuration time	60000ms	
Cycle						
Maximum cycle time	150ms			Enable minimum cycle time for cyclic OBs	True	
Minimum cycle time	1ms					
Communication load						
Cycle load due to communication	50%					
System and clock memory\System memory bits						
Enable the use of system memory byte	False	Address of system memory byte (MBx)	1	First cycle		
Diagnostic status changed		Always 1 (high)		Always 0 (low)		
System and clock memory\Clock memory bits						
Enable the use of clock memory byte	False	Address of clock memory byte (MBx)	0	10 Hz clock		
5 Hz clock		2.5 Hz clock		2 Hz clock		
1.25 Hz clock		1 Hz clock		0.625 Hz clock		
0.5 Hz clock						
SIMATIC Memory Card\Diagnostics						
Aging of the SIMATIC memory card	False	Threshold value	80%			
System diagnostics						
Use fixed numbers for alarm IDs	True	Report network faults as maintenance instead of fault	False			
PLC alarms\General						
Central alarm management in the PLC	True					
Web server\General						
Activate web server on this module	False	Permit access only with HTTPS	True			
Web server\Automatic update						
Enable automatic update	True	Update interval	0s			
Web server\User management						
User name			User rights			
Everybody						
Web server\User-defined web pages						
Application name	HTML source path	Default HTML page	Files with dynamic content	Web DB number	Fragment DB number	
		index.htm	.htm;.html	333	334	
Web server\Overview of interfaces						
Device		Interface		Enabled web server access		
PLC_OPC		PROFINET interface_1		False		
Display\General\Display standby mode						
Time to standby mode	30 minutes					
Display\General\Energy saving mode						
Time to energy saving mode	15 minutes					
Display\General\Display language						
Default language on display	English					

Totally Integrated Automation Portal						
Display\Automatic update						
Time to update	5 seconds					
Display\Password\Display protection						
Enable write access	True		Enable display protection	False		
Display\User-defined logo						
User logo activated	False		Adapt logo	False		Resolution128x120
Company logo	---					
User interface languages						
Assign project language			User interface languages			
English (United States)			German			
English (United States)			English			
English (United States)			French			
English (United States)			Spanish			
English (United States)			Italian			
English (United States)			Japanese			
English (United States)			Chinese (simplified)			
English (United States)			Korean			
English (United States)			Russian			
English (United States)			Turkish			
English (United States)			Portuguese (Brazil)			
Time of day\Local time						
Time zone	(UTC) Dublin, Edinburgh, Lisbon, London					
Time of day\Time-of-day synchronization\NTP mode						
Time-of-day synchronization	Disabled		NTP Server 1			NTP Server 2
NTP Server 3			NTP Server 4			Update interval10s
Time of day\Daylight saving time						
Activate daylight saving time	True		Difference between standard and daylight saving time	60min		
Time of day\Daylight saving time\Start of daylight saving time						
Week at	Last1:00 a.m.		Day	Sunday		inMarch
Time of day\Daylight saving time\Start of standard time						
Week at	Last2:00 a.m.		Day	Sunday		inOctober
Protection						
Level of protection	Full access (no protection)					
Protection\Protection of the PLC configuration data						
Protect confidential PLC configuration data	False					
Protection\Connection mechanisms\Permit access with PUT/GET communication from remote partner						
Permit access with PUT/GET communication from remote partner	False					
Protection\Security event						
Summarize security events in case of high message volume	True		Length of an interval	20		UnitSeconds
OPC UA\General\OPC UA application name						
Application name	SIMATIC.S7-1500.OPC-UA.Application:PLC_OPC					
OPC UA\General\General user management						
Enable additional user management via project security settings	False					
OPC UA\Server\General\Accessibility of the server						
Activate OPC UA server	True					
OPC UA\Server\General\Alarms and Conditions						
Enable Alarms and Conditions on the OPC UA server	False		Allow message acknowledgment by OPC UA client.	False		
OPC UA\Server\General\Global Discovery Server (GDS)						
Enable Global Discovery Push (GDS Push)	False					
OPC UA\Server\General\Server addresses\Server access table						
Address						
opc.tcp://192.168.1.50:4840						
OPC UA\Server\General\Standard server interface (SIMATIC namespace)						
Note	The standard SIMATIC server interface provides all PLC tags, data blocks, methods within the CPU they are accessible for OPC UA in the specific SIMATIC namespace. If the option is disabled, you have to add a server interface below the folder OPC UA communication in the project tree.		Enable standard SIMATIC server interface	True		
OPC UA\Server\Options\General						
Port	4840				Max. session timeout:	30s
Max. number of OPC UA sessions:	10		Max. number of registered nodes:	10000		

Totally Integrated Automation Portal						
OPC UA\Server\Options\Subscriptions						
Minimum sampling interval:	1000ms	Minimum publishing interval:	1000ms	Max. number of monitored items:	1000	
OPC UA\Server\Options\Legacy data type definitions according to OPC UA specification <=V1.03						
Activate TypeDictionary	True					
OPC UA\Server\Security\Secure channel\Security policies						
Note	When the 'No security' security policy is activated, any OPC UA client can still connect using this setting, regardless of any security settings that follow.					
OPC UA\Server\Security\Secure channel\Security policies\Security policies available on the server for the secure channel:\Endpoint security table						
Activate security policy			Name			
True			No security			
False			Basic128Rsa15 - Sign			
False			Basic128Rsa15 - Sign & Encrypt			
False			Basic256 - Sign			
False			Basic256 - Sign & Encrypt			
True			Basic256Sha256 - Sign			
True			Basic256Sha256 - Sign & Encrypt			
OPC UA\Server\Security\Certificates\Certificate settings						
	Use certificates configured and downloaded using TIA Portal					
OPC UA\Server\Security\Certificates\Certificate settings\Server certificate						
ServerCertificateId	2					
OPC UA\Server\Security\Certificates\Certificate settings\Trusted clients\List of trusted clients:						
Automatically accept client certificates during runtime	True					
OPC UA\Server\Security\User authentication\Guest authentication						
Enable guest authentication	True					
OPC UA\Server\Security\User authentication\User name and password authentication						
Enable user name and password authentication	False	Enable additional user management via project security settings	False			
OPC UA\Server\Diagnostics\Diagnostics on status changes						
OPC UA server status changed	True	Session status changed	True			
OPC UA\Server\Diagnostics\Diagnostics of additional events						
Check of security policy failed	True	Request of remote OPC UA client failed	False	Subscriptions: Status changed	False	
Subscriptions: Sampling time errors	False					
OPC UA\Server\Diagnostics\Diagnostics of additional events\Summarize diagnostics						
Summarize diagnostics in case of high message volume	True	Length of an interval	20s			
OPC UA\Server\Export\Export OPC UA XML file of the standard SIMATIC server interface						
Export array elements as separate nodes	True					
System power supply\General						
General	Connection to supply voltage L+					
System power supply\Power segment overview						
Module		Slot		Supply/consumption		
PLC_OPC		1		10.00W		
		Summary		10.00W		
Advanced configuration\Host and domain name\Host name and domain configuration						
Enable host name and domain	False					
Advanced configuration\Host and domain name\Host name and domain configuration\Host name						
Host name configuration:	Set host name remotely (e.g. DHCP)	Host name identical to device name	False	Host name		
Advanced configuration\Host and domain name\Host name and domain configuration\Domain						
Domain configuration:	Set domain remotely (e.g. DHCP)	Domain				
Advanced configuration\Host and domain name\Host name and domain configuration\Full name						
Full name						
Advanced configuration\DNS configuration						
No DNS server address is configured.						
Advanced configuration\IP Forwarding\Configuration IPv4 Forwarding						
Enable IPv4 forwarding for interfaces of this PLC	False					
Advanced configuration\Configuration control\Configuration control for central configuration						
Allow reconfiguration of device via the user program	False					
Advanced configuration\Isochronous mode						
Isochronous mode	False	Intervals:	0.000001ms	Intervals:	0.000001ms

Activate TypeDictionary	True					
OPC UA\Server\Security\Secure channel\Security policies						
Note	When the 'No security' security policy is activated, any OPC UA client can still connect using this setting, regardless of any security settings that follow.					
OPC UA\Server\Security\Secure channel\Security policies\Security policies available on the server for the secure channel:\Endpoint security table						
Activate security policy			Name			
True			No security			
False			Basic128Rsa15 - Sign			
False			Basic128Rsa15 - Sign & Encrypt			
False			Basic256 - Sign			
False			Basic256 - Sign & Encrypt			
True			Basic256Sha256 - Sign			
True			Basic256Sha256 - Sign & Encrypt			
OPC UA\Server\Security\Certificates\Certificate settings						
	Use certificates configured and downloaded using TIA Portal					
OPC UA\Server\Security\Certificates\Certificate settings\Server certificate						
ServerCertificateId	2					
OPC UA\Server\Security\Certificates\Certificate settings\Trusted clients\List of trusted clients:						
Automatically accept client certificates during runtime	True					
OPC UA\Server\Security\User authentication\Guest authentication						
Enable guest authentication	True					
OPC UA\Server\Security\User authentication\User name and password authentication						
Enable user name and password authentication	False	Enable additional user management via project security settings	False			
OPC UA\Server\Diagnostics\Diagnostics on status changes						
OPC UA server status changed	True	Session status changed	True			
OPC UA\Server\Diagnostics\Diagnostics of additional events						
Check of security policy failed	True	Request of remote OPC UA client failed	False	Subscriptions: Status changed	False	
Subscriptions: Sampling time errors	False					
OPC UA\Server\Diagnostics\Diagnostics of additional events\Summarize diagnostics						
Summarize diagnostics in case of high message volume	True	Length of an interval	20s			
OPC UA\Server\Export\Export OPC UA XML file of the standard SIMATIC server interface						
Export array elements as separate nodes	True					
System power supply\General						
General	Connection to supply voltage L+					
System power supply\Power segment overview						
Module		Slot		Supply/consumption		
PLC_OPC		1		10.00W		
		Summary		10.00W		
Advanced configuration\Host and domain name\Host name and domain configuration						
Enable host name and domain	False					
Advanced configuration\Host and domain name\Host name and domain configuration\Host name						
Host name configuration:	Set host name remotely (e.g. DHCP)	Host name identical to device name	False	Host name		
Advanced configuration\Host and domain name\Host name and domain configuration\Domain						
Domain configuration:	Set domain remotely (e.g. DHCP)	Domain				
Advanced configuration\Host and domain name\Host name and domain configuration\Full name						
Full name						
Advanced configuration\DNS configuration						
No DNS server address is configured.						
Advanced configuration\IP Forwarding\Configuration IPv4 Forwarding						
Enable IPv4 forwarding for interfaces of this PLC	False					
Advanced configuration\Configuration control\Configuration control for central configuration						
Allow reconfiguration of device via the user program	False					
Advanced configuration\Isochronous mode						
Isochronous mode	False	Intervals:	0.000001ms	Intervals:	0.000001ms
